

This document will guide you through the installation process for Océ Client Tools.

Before you begin: If you will be using this program to submit PDF files for printing, then you must make sure Ghostscript is installed before proceeding. To download the latest version of Ghostscript, go to www.ghostscript.com/download. If Ghostscript is already installed on your system, then Océ Client Tools will automatically detect it and configure itself accordingly.

For more information, contact the IT department at Dominion Blue.

1. Make sure the installation executable and the configuration file (WebXg.ctcfg) are in the same folder. Start the InstallShield Wizard by double-clicking on the OCT254_Client_Tools_2.5.4.0.exe executable.

7. When the installation is complete, click Finish.

8. Your system will need to be restarted. Make sure you've saved all your work and closed all other applications, then click Yes.

9. After your computer reboots, you should see the Oce Publisher icon on your desktop, which looks like this:

10. Finally, when you run Publisher for the first time, you must disable encryption for Direct Transfer destinations. To do this, go to the Tools menu, select Proxy Manager and make sure the option called "Use encryption for Direct Transfer destinations" is <u>unchecked</u>.
